Est 1991

# Company Profile

Founded in 1991 | Inspired by Nature, Perfected by Craftsmanship

## Who We Are

Alhamd Granite & Marble (AG&M) is a distinguished name in Pakistan's natural stone market, renowned for its dedication to excellence, tradition, and innovation. Founded in 1991 by Masood ul Hassan, AG&M is a privately-owned, small to medium-sized enterprise rooted in the heart of Pakistan's rich geological landscape. With over three decades of market expertise, we specialize in the extraction, processing, and trade of high-quality marble and granite, catering to both local and international markets.

## What We Do

### 1. Extraction & Processing

At the core of AG&M's operations lies the meticulous extraction of raw stone from some of Pakistan's finest quarries. We utilize advanced techniques and machinery to process marble and granite into premium slabs, tiles, and customized fixtures—ensuring durability, elegance, and finish that stands the test of time.

### 2. Local Trade & Projects

AG&M has proudly contributed to prominent renovations and interior installations across Pakistan. From religious landmarks and public buildings to exclusive private residences, our stonework adds timeless elegance and architectural significance to every project.

### 3. International Trade

AG&M is also engaged in the import and export of raw monolama marble blocks, serving reputable clients in Taiwan, China, and the Far East. Our commitment to quality and consistency has earned us strong business relationships across borders, reflecting our credibility on the global stage.

## Key Projects & Highlights

- Marble renovation of religious institutions and public sector offices
- Supply and installation of customized marble and granite solutions for private villas and homes
- Trusted exporter of raw stone blocks to leading buyers in East Asia
- Consistent track record of customer satisfaction and on-time delivery

## Why Choose AG&M?

- ✓ Over 30 Years of Legacy
- ✓ Locally Sourced, Globally Trusted
- ✓ Craftsmanship Rooted in Tradition & Innovation
- ✓ Commitment to Quality, Precision & Service

Synthetic  
Granite**

# What is Synthetic Marble

Synthetic Marble (also known as artificial, cultured or engineered stone) is a man made material designed to mimic the appearance of natural marble made by combining natural marble dust with polyester resins, epoxy and pigments to customize colors and shades.

## Advantages of Synthetic Marble

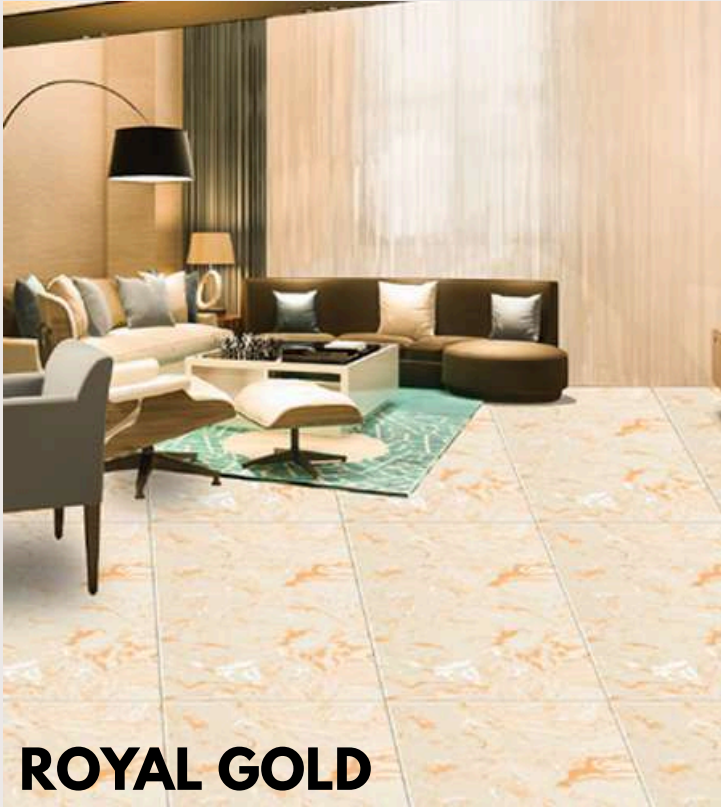

- Uniform Appearance – Consistent color and veining patterns, unlike natural marble’s variability.
- Non-Porous Surface – Resists stains, bacteria, and moisture better than natural marble.
- Low Maintenance – Does not require sealing, unlike natural stone.
- Customizable Designs – Available in a wide range of colors, patterns, and finishes.
- Lightweight – Easier to transport and install compared to natural marble.
- Durable – Less prone to cracking and chipping than natural marble.
- Cost-Effective – More affordable than high-end natural marble.

## Dos and Don'ts

- Do not use harsh cleaners to clean surfaces made of artificial marble
- Do not use on outdoor surfaces as exposure to heat and UV radiations may cause the material to crack and / or discolor
- Do not place hot objects like pans etc directly on the surface
- Only use soft sponge to clean the surface especially after a spill

# Artificial Marble is a great choice for:

- Bathroom tops
- Staircases
- Vanity
- Floors & Walls
- Tables
